

Srt-live-server

Srt-live-serveur permet de faire du streaming, mais via l'UDP.

Docker-compose x86_64 :

```
# https://hub.docker.com/r/baluzs/srt-live-server
version: '3'
services:
  srt:
    image: baluzs/srt-live-server
    ports:
      - 1935:1935/udp
    restart: unless-stopped
    volumes:
      - sls:/etc/sls
      - logs:/logs
volumes:
  logs:
  sls:
```

Docker-compose ARM64 :

```
# https://github.com/ravenium/srt-live-server
version: '3'
services:
  srt:
    image: ravenium/srt-live-server:latest
    ports:
      - 1935:1935/udp
    restart: unless-stopped
    volumes:
      - logs:/logs
volumes:
  logs:
```

Pour l'utilisation :

Coté OBS : `srt://ip.serveur:port?streamid=input/live/lenomdustream`

Coté VLC : `srt://ip.serveur:port?streamid=output/live/lenomdustream`
